- TV & Radio Commercials. Video for the web
- Website design
- Design of logos, business cards, leaflets, flyers, menus, posters, invitations, brochures, etc
- Documentaries
- Interactive CD-ROM & DVDs
- Audio-guides and Audio Recording

IT OUTSOURCING

B360's primary goal is to become an extension of your company while providing you the value of a fully staffed corporate IT department.

We keep your business IT operations running day-to-day. B360 personalizes the IT services for each of its clients. Our outsourcing services include:

- Application development and maintenance
- Desktop support
- Help desk services
- Disaster recovery services
- IT security
- Network operation
- Website Design and Development Solutions

TURN KEY OPERATIONS

B360 provides full turnkey setup of networks, communications systems, offices, upgrades, and conversions. We can design, procure, configure, and implement your next IT project saving your time and resources.

IT SYSTEM AUDIT

A great number of business managers do not really understand their IT infrastructures. B360 provides them with a review of what they have, how it is working for them and what need to be improved.

We evaluate your current IT infrastructure and policies to determine if your infrastructure will be sufficient for the current needs and future growth of your company. The audit is also useful for verifying the confidentiality and integrity of your systems.

APPLICATION DEVELOPMENT, INSTALLATION AND MAINTENANCE

A technically strong, dedicated development team understands your application requirements thoroughly, prepares architecture, develops, tests and finally implements it. We rely on industry-standard software development practices, and rigorously test the applications to ensure defect-free delivery.

We encourage the SaaS/ Hosted applications utilization whenever and wherever SaaS does bring significant advantages for organization looking. B360 can guide SaaS selection and support in the daily implementation of the application.

DISASTER RECOVERY PLANNING

The wake of a disaster is not the time to be planning your recovery strategy. B360 can assist in putting plans in place prior to a disaster to assist in getting your company back online.

BACKUP

Data loss is one of the greatest impacts to businesses today. B360 works with clients to establish Backup routines to protect against data losses or corruptions.

IT SECURITY

Security is a paramount concern for all companies operating on the internet. We provide comprehensive security services to protect your vital information, including firewalls, anti virus and anti spam solutions. We provide IT monitoring and maintenance to perform preventative maintenance and protect your network from threats.

HELP DESK SERVICES

Through our Help Desk, we offer support in real time to help you quickly resolve any issue. We use advanced remote technologies that allow us to address issues immediately for computers, peripherals, PDAs, servers, switches, as well as software issues

STRATEGIC IT CONSULTING

The easiest way to avoid unforeseen IT expenses is future planning. By mapping your systems and understanding your projected growth, B360 can develop a road map making sure your network scales with your organization.

By following this road map you see a greater return on your investment, as well as an increased lifecycle for the equipment

DESKTOP SUPPORT

From product acquisition to disposal, B360 desktop technicians can support the entire life-cycle of your IT assets, providing customized desktop services based on the nuances of your environment and the technical capabilities of your end users.

We provide IMAC (Install/ Move/ Add / Change) support. Moving to a new office? Rolling-out a new operating system? Updating your systems? Transferring data? Selecting the right notebook for you? Defining the strategy for replacing a software? B360 can do all of these for you. We even train the end-user on changes were made.

WEBSITE DESIGN AND DEVELOPMENT SOLUTIONS

When it comes to your website design and development, B360 provides a complete turnkey solution: developing web-friendly content, graphic design, programming and hosting. Whatever the size of your website, from a simple static site to a content-rich, complex site, we can provide you with the best solution to meet your needs.

NETWORK OPERATIONS

With IT networks becoming more complex by the day, maintaining networks on your own can be very challenging at times hence outsourcing to B360 is a viable alternative due to reasons such as specialization in the field, gaining access to a number of skills set at a single price.

Network management includes planning the design of the network, maintaining the network hardware and software, integrating new software and hardware, server upgrades to stay abreast with latest developments, supervising the resources, supporting the users, defending the network from hackers.
